SURY PRAKASH YADAV

sury-prakash-yadav | suryprakash513@gmail.com | +91 8521101551

Summary

Java Backend Developer with 3.6+ years of experience across backend and database engineering, including 2+ years building production RESTful APIs and services with **Java and Spring Boot** for enterprise ERP platforms. Strong in **Spring Data JPA, Hibernate**, and secure API design with Spring Security, **JWT, and OAuth2**, complemented by dedicated **SQL performance-tuning** experience from a database engineering role. Containerizes and deploys services to cloud infrastructure with **Docker and CI/CD**, and collaborates effectively in cross-functional Agile Scrum teams.

Technical Skills

Languages: Java 8/17/21, SQL, JavaScript, HTML, CSS
Backend: Spring, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Spring AOP, RESTful APIs, JSON
Testing: JUnit 5, Mockito, Postman
Databases: MS SQL Server, MySQL, MongoDB
Cloud: Oracle Cloud Infrastructure (Object Storage, Container Registry, Container Instances, API Gateway), AWS (S3, Lambda, API Gateway, ECR), Oracle Integration Cloud, Oracle VBCS
Concepts: OOP, SOLID, DRY, Design Patterns, Microservices, Multithreading, Collections, Streams, Exception Handling, ACID, System Design, Clean Code, Agile Scrum
DevOps & Tools: Docker, Git, GitHub, GitHub Actions, CI/CD, Maven, Postman, Jira, IntelliJ IDEA, VS Code, GitHub Copilot, Claude Code

Professional Experience

Consultant (Java Developer) — *InfiNevoCloud Technology Solutions Pvt. Ltd.* **Sep 2024 – Present**

- Designed and delivered scalable **RESTful APIs** using **Java and Spring Boot** for enterprise ERP applications, building reusable service layers and maintainable business logic guided by **OOP, SOLID principles, and design patterns**.
- Improved application performance by optimizing **Spring Data JPA and Hibernate** data-access logic — **eliminating N+1 query** patterns, refining entity mappings and fetch strategies, and rewriting underlying **SQL** with appropriate indexing.
- Secured backend services with **Spring Security, JWT, and OAuth2**, implementing role-based authorization to protect sensitive business operations and API resources.
- Built a centralized request-validation and global exception-handling framework, delivering consistent, meaningful error responses across all REST endpoints and reducing ambiguous production support tickets.
- Engineered enterprise integrations with **JD Edwards Orchestrator REST APIs and Oracle Integration Cloud (OIC)** — implementing scheduled and event-driven orchestration, data transformation, and routing, plus reusable Java utilities that normalized complex responses into standardized structures.
- Increased throughput of batch data operations using **Java multithreading, Collections, and the Streams API** for efficient in-memory processing and aggregation.
- Containerized applications with **Docker** and deployed to **Oracle Cloud Infrastructure**, using Container Registry, Container Instances, Object Storage, and API Gateway secured by SSO-based authentication.
- Developed enterprise web interfaces with **JavaScript, HTML, CSS, and Oracle VBCS**, integrating them against Spring Boot REST services.
- Contributed in **Agile Scrum** delivery — sprint planning, peer code reviews, and requirement analysis with functional consultants and QA.
- Integrated **AI-assisted development tools** (Claude Code, GitHub Copilot) into daily development for scaffolding, refactoring, and rapid prototyping — accelerating feature delivery while maintaining code quality through peer review and testing.

Junior Database Engineer — *Aggregate Intelligence India Pvt. Ltd.* **Jul 2022 – Nov 2023**

- Developed and optimized complex **SQL queries, stored procedures, triggers, and user-defined functions** supporting business-critical database operations.
- Improved database performance through **query optimization, index design, execution-plan analysis, schema optimization, and query rewriting** on high-volume datasets.
- Partnered with application development teams to design scalable database solutions aligned to application functionality and performance requirements.
- Supported database migration, deployment, backup, and production release activities while maintaining reliability and operational continuity.

Education

B.Tech in Computer Science & Engineering **Jul 2018 – Jun 2022**
Siliguri Institute of Technology, West Bengal **CGPA: 8.74/10**
